Three Featured Nurture Kids Day Out Activities

Exploring Singapore: A Hopscotch and Tunnel Adventure Celebrating National Day

Movement Type: Active Navigation Route

Contributed by:

Teacher Ramilo Ryan Bautista

PCF Sparkletots @ Punggol Coast Blk 326

Description:

As Singapore is my second home, I am inspired to explore more of its beauty and culture. I designed this activity to enhance children's movement skills while educating them about Singapore's famous landmarks. By engaging in this activity, children will improve their physical abilities and gain a deeper understanding and appreciation of their surroundings. It also encourages communication and collaboration among children, promoting teamwork and social interaction.

Hover Over The Orchid

Movement Type: Active Play Corner

Contributed by:

Teacher Faridah Binte Razali

PCF Sparkletots @ Paya Lebar Blk 23

Description:

When I created this activity, I took inspiration from various beautiful places and scenery found in Singapore, as well as our national flower. I designed this activity to acquaint children with places of interest in Singapore by engaging them in physical movements like hopping. At the same time, I integrated numeracy skills for the children to practise counting as they participate in the activity. Through this activity, I hope to empower children to tackle challenges at their own pace.

I'm a SCDF Firefighter

Movement Type: Integrated Learning

Contributed by:

Teacher Nur'Ain Binte Ismail

PCF Sparkletots @ Paya Lebar Blk 125

Description:

As an educator, I aim to support children's experience through a variety of meaningful and fun movement activities. 'I'm a SCDF Firefighter' allows children to explore different locomotor skills through a role-play that engages children to problem solve and adapt in different scenarios while making their way to protect Singapore. This activity was intentionally and thoughtfully planned for children to experience physical movements. Children are also engaged in numeracy skills such as counting. By taking part in this obstacle course, children will be able to display confidence and be creative learners while caring for others. As an active learner myself, I hope to spark interest in young children to stay active and be curious about the world around them.
